

Networking

Cooperation pays off to everyone!

- Are you an entrepreneur who wants to start cooperation with a research institution? Are you searching for partners in your project?
- Are you a scientist searching for an entrepreneur for testing or implementation of your idea?
- Do you want to support development of smart specialisations and take advantage of their development?

What is networking?

- starting and maintaining of mutual relations, in order to achieve benefits. The benefits that can be achieved from activity in a network are greater than the benefits that can be achieved when acting on your own (effect of synergy). These benefits can have not only a financial dimension - but also the social one!

Why use networking in the scope of national smart specialisations?

- to exchange knowledge and ideas
