

Support instruments in the scope of operational programmes

Are you wondering if smart specialisations are for you? Here is our answer: Of course, they are!

- Would you like to develop in the fields with future?
- Would you like your ideas or inventions to serve better life?
- Would you like your company to be competitive in home or international market?
- Do you need investment funds for realisation of innovative ideas?
- Do you engage your own funds in implementation of research and development projects, but you would like to do it with a flourish or with partners who may help you?

Take advantage of co-financing of projects!

In the years 2014-2020 there is the available support in the scope of the EU programmes:

- Smart Growth Operational Programme
- Operational Programme Eastern Poland
- Horizon 2020 Programme
- Regional Operational Programmes

- Regional Operational Programme for Zachodniopomorskie Voivodeship
- Regional Operational Programme for Pomorskie Voivodeship
- Regional Operational Programme for Kujawsko-Pomorskie Voivodeship
- Regional Operational Programme for Warmińsko-Mazurskie Voivodeship
- Regional Operational Programme for Podlaskie Voivodeship
- Regional Operational Programme for Mazowieckie Voivodeship
- Regional Operational Programme for Łódzkie Voivodeship
- Regional Operational Programme for Wielkopolskie Voivodeship
- Regional Operational Programme for Lubuskie Voivodeship
- Regional Operational Programme for Dolnośląskie Voivodeship
- Regional Operational Programme for Opolskie Voivodeship
- Regional Operational Programme for Świętokrzyskie Voivodeship
- Regional Operational Programme for Małopolskie Voivodeship
- Regional Operational Programme for Śląskie Voivodeship
- Regional Operational Programme for Lubelskie Voivodeship
- Regional Operational Programme for Podkarpackie Voivodeship

Reach for support - it is worth it! It pays off!

In the scope of the **Smart Growth Operational Programme (SG OP)** the Priority Axes I, II and IV are directed solely at the national smart specialisations. In the priority axis III, preferences (additional points during evaluation of applications) are applied for the projects that fit in the national smart specialisations.

The below table shows the allocation aimed for financing of NSS in SG OP 2014-2020

Priority axis	Allocation
I axis - Support for R+D works by enterprises	EUR 3,85 billion
II axis – Support for the environment and potential of enterprises pursuing activity in the scope of R+D+I	EUR 1,04 billion
III axis – Support for innovation in enterprises	EUR 2,2 billion

IV axis – Increase in science and research potential EUR 1,22 billion

Note! When applying for financial support for the actions in the scope of R+D+I in the scope of the Smart Growth Operational Programme and the Regional Operational Programmes, it is necessary for entrepreneurs to have their own contribution.
