

Conference on Sensor and photonic technologies for the industry

The Ministry of Entrepreneurship and Technology in cooperation with the Working Groups for national smart specialisations - NSS 13 Photonics and NSS 9 Sensors (including biosensors) and smart sensor networks organizes a conference entitled „Sensor and photonic technologies for the industry”, combined with the presentation of the achievements of Polish companies in the creation and development of fiber optic photonics.

The idea behind the event is to present the offer of ready-made photonic and sensor products dedicated to the industry. Polish entrepreneurs from above industries will present ready-made or almost-ready products to potential interested parties (TRL 8-9) and visualize the implementation process as well as the purchase and sales process. During the event, about 15 presentations of individual companies are planned.

The conference will be held on March 19, 2019 at the headquarters of the Ministry of Entrepreneurship and Technology (Plac Trzech Krzyży 3/5, Warsaw)

The conference is closed, participation is possible after receiving the invitation from the organizer and confirmation of registration.
